

Orange1 (Elprom) - Electric Motors

Flameproof Electric motors, die cast aluminium version to ATEX;II2G(D), IECex certified, EXD(e) IIB & IIC; T3 – T6 in frame Sizes 56 -180. Std IP66. This lightweight, yet well-featured motor design is ideally suited to applications requiring weight saving eg. Air conditioning, Dosing pumps and Geared motor Flameproof area applications.

ATB FMP (former F&G)- Electric Motors

Flameproof Electric motors, Cast Iron version to ATEX and IECeX,II2G (D) EXD(e) IIB & IIC, T3-T6 in frames 63-450. Special executions for most industries. German manufactured and world recognized.

AEM - Electric Motors

A leading German manufacturer of Synchronous and Asynchronous Generators and 3 phase LV,MV and HV electric motors. Available executions include slipring for cranes and hoists, marine, pulp and paper and material handling. Motors and Generators manufactured to specific customer requirements.

Mistral Centrifugal Fans

One of the best-known centrifugal fan manufacturers in Europe. Output values ranging from 50 m³/h to 68000 m³/h with pressures between 6 mm H₂O and 1000 mm H₂O (59 Pa - 17900 Pa).

KURT MAIER MOTOR-PRESS GMBH

kmmp - Components for IEC Electric Motor Manufacturers. One of Europe's leading suppliers of IEC AC and DC components to the Electric Motor Manufacturing Industry. Supply includes both cast- Iron and aluminium housings, End shields, Stator/rotor packs, Terminal boxes / Boards, cooling Fans & Covers, Extruded aluminium sections in a range of designs. We also supply the Temporeti range of AC / DC disc brakes.

Flameproof
Motors

Cemp - Electric Motors

Flameproof Electric motors, Cast iron version to ATEX and IECex,II2G (D) EXD(e) IIB & IIC, T3-T6 in frames 63-315. Special motor designs, integrated brake motors available. Cemp is recognized worldwide for a quality build.

VEM - Electric Motors

Standard, explosion proof and customized solutions available from one of the largest manufacturers in Germany. Frames from 56-355, Slipring Motors available from 132-315, custom designed roller table motors for the Steel Industry, brake motors, marine duty and motors for smoke and heat extraction are only some of what Vem has to offer.

KURT MAIER MOTOR-PRESS GMBH

kmmp - Axial and Radial Forced Ventilation for Inverter and Vector Duty Motors

KMMP is one of the leaders in manufacture and supply of Forced ventilation units in Europe. We produce both standard and customized units for virtually any IEC and NEMA frame brands worldwide. Units feature a wash-down rating of IP66 in frame sizes 56-450, with special fan design to significantly reduce noise levels. All units are labeled UL/CSA.

Frequency Inverters

KMMP offering INVT frequency inverters for electric motors. The GD 350 is a brand new high-performance inverter. It is highly extensible and flexible with PG card, PLC card, communication card and IO card, meeting the demands of various industries.

VEM Sachsenwerk

VEM Sachsenwerk GmbH is specialise in the field of large and special machines. For over 110 years the Dresden VEM company has produced medium and high-voltage machines for individual industrial applications of up to 60 megawatts. VEM Sachsenwerk manufactures specifically to complex customer specifications. The large and special machines are characterised by high utilisation via electro-magnetic optimisation with low mounting volumes. This applies for motors and generators as well as for traction and special models.
