

INVT GD20 High Performance AC VFD-Variable Speed Drive

GD20 Series Mini Vector Control Drive- Product Introduction

Goodrive20-EU is a general purpose vector control inverter with certified STO (Safe Torque OFF) function.

GD20 Series general vector inverter is designed for the lower power market and uses a leading edge Vector control Algorithm. Excellent product features, compatible for either wall or DIN rail mounting, compact design ensures valuable space saving.

Features

- Single Phase 220V: 0.4kW to 2.2kW
- Three Phase 380V: 0.75kW to 2.2kW
- Supports wall mounting and rail mounting
- Sensorless Vector control
- Built-in Braking unit
- HDI/Y1 terminals
- Mini structure: Smaller size, saving installation space.
- Interface: Standard RS485, rich input/output terminals, external keypad.
- Compact design
- Easy maintenance
- Various mounting options
- Excellent overall performance
- Multi-functional and easy to operate

Typical Applications

- Plastic machinery
- Food machinery (packing, conveyer etc...)
- Ceramic machinery
- Printing and packaging machinery
- Textile Machinery
- Treadmills
- Trimmers
- Garment cutting machines
- Bag making machines
- Engraving machines
